

PRE/IN/POST-position listing

or

English idioms/phrases categorized by a PRE/IN/POST-position

Who cares (I don't, if you do, please tell me why at sanmayce@sanmayce.com) what is the difference between **conjunctions**, **adverbs** and **prepositions** when it comes to collocations i.e. COLLOCATIVES, that is, who cares what is the part-of-speech role of binding words within a given phrase i.e. n-gram?! My current view: the name of the game is: **EXPLORE the BINDING-WORDS (and their use within the BUILDING-BLOCKS) of English language**, as in 'MiB III' movie where the stable phrase "**trust me on this**" was used, not as an ESL dummy (like me) would use 'about' or 'for'. A BUILDING-BLOCK as the above one (where 'on' is the BINDING-WORD) is what I am talking about. Naturally **conjunctions plus adverbs plus prepositions** fall in one category: BINDING-WORDS.

conjunction

n.

...

4. Abbr. conj. Grammar

a. The part of speech that serves to connect words, phrases, clauses, or sentences.

b. Any of the words belonging to this part of speech, such as and, but, as, and because.

...

[Middle English coniunccioun, from Old French conjunction, conjuncion, from Latin coniunctiō, coniunctiōn-, a joining, conjunction (in grammatical sense, translation of Greek sundesmos, **binding together**, conjunction), from coniunctus, past participle of coniungere, to join ; see conjoin.]

adverb

n. Abbr. adv.

1. The part of speech that modifies a verb, adjective, or other adverb.

2. Any of the words belonging to this part of speech, such as so, very, and rapidly.

[Middle English adverb, from Old French, from Latin adverbium (translation of Greek epirrḗma) : ad-, **in relation to** ; see ad- + verbum, **word**, verb; see wer-5 in Indo-European roots.]

preposition

n. Abbr. prep.

A word or phrase placed typically before a substantive and indicating the relation of that substantive to a verb, an adjective, or another substantive, as English at, by, with, from, and in regard to.

[Middle English preposicioun, from Old French preposicion, from Latin praepositio, praepositio-, a putting before, preposition (translation of Greek prothesis), from praepositus, past participle of praepōnere, **to put in front** : prae-, pre- + pōnere, to put; see apo- in Indo-European roots.]

Okay, since my English is forever broken I need an ever-presented (i.e. available before me) such a list in hardcopy (as well and mostly). My goal is to collect (in this document) all 'Heritage' dictionary *Phrasal Verbs* and *Idioms* (as a start).

The idea is to systemize all stable/major phrases by the PRE/IN/POST-position used within. What part of speech a word plays it doesn't matter (to me).

The idea behind this idea is a mini-corpus suggestions-oriented (i.e. quick-look-up friendly) to be available under your fingers while typing a 2/3/4/5-gram containing one of our PRE/IN/POST-positions.

Of course, as a by-product an easy to the eyes listing will *come in handy* (grmb1, this important phrase is outwith 'Heritage'). Here 'in' is an IN-position, as you might already noted I hate the term 'preposition' - it fails to stand for this name not to speak of n-grams where it is meaningless. See further below for 3-grams (1000[+] occurrences) derived from my 'Gamera' English corpus. Well, the original idea is to make such PRE/IN/POST-positional surveys for ANY word - this is huge but English is huge too, so this path should be traversed without hesitation.

First off (oh, an idiomatic phrase already) I want to juxtapose two words badly known (in regards to their common root which here reveals the real/base meaning for real): idiom and idiot.

idiom

n.

1. A speech form or an expression of a given language that is peculiar to itself grammatically or cannot be understood from the individual meanings of its elements, as in keep tabs on.
2. The specific grammatical, syntactic, and structural character of a given language.
3. Regional speech or dialect.
4.
 - a. A specialized vocabulary used by a group of people; jargon: legal idiom.
 - b. A style or manner of expression peculiar to a given people: "Also important is the uneasiness I've always felt at cutting myself off from my idiom, the American habits of speech and jest and reaction, all of them entirely different from the local variety" (S.J. Perelman).
5. A style of artistic expression characteristic of a particular individual, school, period, or medium: the idiom of the French impressionists; the punk rock idiom.

[Late Latin idiōma, idiōmat-, from Greek, from idiousthai, to make one's own, from **idios**, own, personal, private; see s(w)e- in Indo-European roots.]

idiot

n.

1. A foolish or stupid person.
2. A person of profound mental retardation having a mental age below three years and generally being unable to learn connected speech or guard against common dangers. The term belongs to a classification system no longer in use and is now considered offensive.

[Middle English, ignorant person, from Old French idiote, from Latin idiōta, from Greek idiōtēs, private person, layman, from **idios**, own, private; see s(w)e- in Indo-European roots.]

A pretty clear etymology, I am still in darkness why 'idiot' has lost its base meaning and remained with the offensive one - my guess is simple: as in life the easiest/honorless thing is to disparage/offend/ridicule people with their own way of life. My second guess (not second-guess) is that all people who use idioms should be called idiots - the more idioms they use the more idiotic they should be, he-he.

Down to the list ('on', 'down' finished):

HERITAGE 4th: in search of all 'on' PREFIX idioms i.e. wildcard: 'on *'

on (one's) deathbed ~ Close to death.

on (one's) feet ~ 1. Standing up: The crowd was on its feet for the last ten seconds. 2. Fully recovered, as after an illness or convalescence: The patient is on her feet again. 3.
