Note1: If you are not going to use wildcards at all then
the pattern must be equal to the whole(not partial match) line.
Note2: Seven wildcards are available:
wildcard '*' any character(s) or empty,
wildcard '@/#' any character {or empty}/{and not empty},
wildcard '^/$' any ALPHA character {or empty}/{and not empty},
wildcard '|/%' any NON-ALPHA character {or empty}/{and not empty}.
Note3: Due to different line endings(CRLF in Windows; LF in UNIX)
you must add a '@' wildcard in place of CR:
for example in case of searching for '*.pdf' write '*.pdf@', our files
need the '@' wildcard they are in Windows format.
Note4: In Example1 '$$$$' allows 'onto' or 'upon' to emerge.
Note5: In Example2 '^^^' allows 's' or 'ed' or 'ing' to emerge.

Enter your pattern(s) one at a line, to start searching press 'F6' release and then 'Enter':

Nastassja Kinski

one of the finest creatures I have ever seen

Madame *Nastassja* let me express my veneration.

You say you want to make something really good for the world ... I say you already DID IT. *Lao Zi* says 'Be an example to the world', I dare to say you already DID IT. In my view you are part/embodiment of the Mystic Female.

Your personality is beyond my comprehension since 1990, for more than 20 years you are one of the very few true, sensitive and really kind creatures who give me faith to go on.

It hurts looking how this chaos torture the pure creatures like you. It is so hard for me to see innocence under all kind of disgusting attacks.

So please do not torment yourself with the ugliness of this world.

Best regards and take care,
Georgi 'Sanmayce'

Windows taskbar showing Start button, taskbar icons (including [3/14] llo - Is it love - The ... and Package 'Graphein' a 4-gr...), system tray (including GRAPHEIN PROMPT, EN, and system clock 2:51 AM).

The screenshot shows a Windows desktop environment with three Notepad windows and a file explorer. The file explorer on the left displays a list of files in a folder named 'D:\Package 'Graphin' a 4-gram-Phrase-Checker, revision 1++'. The files listed include '26Clash_Intel.BAT', '26Clash_Microsoft.BAT', 'Graphin_26_distinct_ARCHIV...', 'GRAPHEIN_keyboard.bat', 'GRAPHEIN PROMPT', and numerous 'letter.quadrupleton.txt' files with various suffixes like '_overlapped_all_distinct' and '_unfamiliar_all_distinct'. The three Notepad windows are open, showing the content of these text files. The first window shows the original text, the second shows the overlapped text, and the third shows the unfamiliar text. The taskbar at the bottom shows the Start button, several application icons, and the system tray with the time '2:59 AM'.
